Building a connected and accessible neighbourhood

# Our commitment

The City of Stirling is working to build a more connected and accessible community through an extended network of footpaths and cycleways. Footpaths play a vital role in creating safe, healthy, and connected neighbourhoods.

Your street has been nominated for inclusion in the City's footpath program, pending budget approval by Council in the next financial year.

## Timely information

We're currently in the design phase of the footpath program. Once the timing and location are confirmed, we'll keep you informed with clear and timely updates as we move closer to installation.

## Footpath placement

To ensure the best outcome for your street, we carefully consider factors such as tree protection, power poles, terrain and existing path connections. The final placement will be confirmed and communicated before installation begins.

## Minimal disruption

We will protect street trees, reinstate any affected reticulation systems, remove any debris and restore the area around the footpath.

## Address concerns

We value your feedback and encourage you to submit your questions to us either online at [www.stirling.wa.gov.au/enquiries](http://www.stirling.wa.gov.au/enquiries) or call us on (08) 9205 8555.

## Why footpaths matter:

### Safety

Ensures safety for children, the elderly, parents with prams and those with mobility challenges.

### Independence

Helps the community move around more freely and safely.

### Health

Encourages walking and cycling, leading to healthier lifestyles and reduces traffic on our roads.

### Community

Brings neighbours together and fosters a sense of community.

### Pets

Provides a safe space for pets to walk on a lead, away from vehicle traffic.
