

## Texture pack

A selection of plants with interesting textures and shapes plus bright colours, they are hardy, attract a variety of wildlife and once established, have very low water requirements.

## Species

1. **Darwinia "Seaspray"** (*Darwinia citriodora* - prostrate form) – H 30cm, W 90cm  
An attractive small groundcover or container plant, it has lemon-scented silvery-green foliage and unusual orange & red flowers from winter through to summer. Attracts honeyeaters, butterflies and native bees.
2. **Snakebush** (*Hemiandra pungens*) – H 50cm, W 200cm  
Groundcover with prickly foliage and purple flowers in summer. Tolerates full sun or partial shade. Prefers well-drained light to heavy soils.
3. **Nobby Clubrush** (*Ficinia nodosa*) – H 100cm, W 80cm  
A fast growing native tussock grass with globular seed heads from mid-spring to early summer.
4. **Grey Cottonheads** (*Conostylis candicans*) – H 50cm, W 50cm  
Prefers a full sun to part shade position in well-drained soil including coastal. Flowers from autumn through to spring. Attracts nectar eating birds.
5. **Cushion Bush** (*Leucophyta brownii*) – H 70cm, W 100cm  
Small rounded shrub with silvery-white foliage and small yellow flowers from late spring to summer.
