One of the aims of the Scarborough Beach Redevelopment is to achieve a pedestrian friendly environment with emphasis on walking, cycling and public transport. The planning completed to date has reinforced this position and the State Government is endeavouring to deliver new infrastructure that will help realise this shift to more sustainable modes of transport.

This is the initial parking scheme proposal for Scarborough Beach which may be amended in the future to ensure the use of the parking facilities supports the prosperity of the precinct.

1. **Can I get a resident’s parking permit?**

   No, residential parking permits are not available.

   With more than 450 residential premises in the parking scheme area, it is not possible to provide this number of permits without impacting visitor parking.

   The parking scheme has been designed with no time restrictions between the hours of 6pm and 8am to allow for overnight parking. Parking is permitted for up to 4 hours in some areas and a small number of unrestricted parking bays are available. All day parking is also available within the paid parking facility in Manning Street (438 bays).

2. **Can I get a permit for my staff?**

   No, parking permits for staff are not available.

   Parking is limited and the intention of the scheme is to maximise parking availability for visitors and increase trade for businesses in the area. Staff can park for up to 4 hours in some areas and a small number of unrestricted parking bays are available. All day parking is also available within the paid parking facility in Manning Street (438 bays).

3. **Can I move my car within time restricted parking areas in order to park for longer periods?**

   No, once the parking duration stated on the sign has been reached, the City’s parking local law requires vehicles to be removed for a minimum of one hour.

4. **Why are there parking spaces allocated to the Scarborough Beach Pool?**

   The City has access to a small number of bays to support the safe operation of the Scarborough Beach Pool and lifesaving operations. This parking ensures access to bays for lifeguards to enable effective supervision and operations of the beach and the pool. The area will also be used by beach Inspectors to ensure provision of lifesaving services to a large area of the City’s coastline, improving public safety and maintaining high levels of service to beach patrons.
5. How many parking spaces are there available in the precinct?

There are over 1200 parking spots available in the area inclusive of:

- Reserve Street car park – 126
- Manning Street car park (fees payable) – 438
- Northern carpark – 294
- The Esplanade (1 hour area) – 38
- Southern carparks – 284
- Adjacent to Brighton Reserve – 18
- Restricted parking for operations – 20

The above numbers include accessible parking bays and there are also another 26 motor cycle bays available.
