

Community and Stakeholder Engagement Procedures

4. Implement and engage

The City has developed a suite of procedures and resources to support each stage of engagement and embed best practice community engagement principles into projects across the organisation. One of the key features of this approach is a new e-Tool for use by staff when planning their engagement approach.

1. Decide and analyse

The beginning of planning phase, this step identifies projects and categorises them as:

- a. Strategic Place planning / social planning
- b. Partnership State Government / community led
- c. Legislative Local laws / town planning
- d. Operational Bin tagging / tree planting
- e. Infrastructure and Facilities Plavorounds / Recycling Centre.

Engagement requirements may change depending on the classification.

Scope of the engagement is agreed with the project team. In this step the context is built by:

- a. Knowing where the project has come from
- b. Setting success criteria for the engagement
- c. Identifying the relevant stakeholders
- d. Assessing the impact of the project on:
 - 1. Community
 - 2. Elected Members
- 3. Administration. _____

We ask ourselves questions like:

What will happen if the community isn't involved in this project?

Will this project damage the City's reputation?

Is the project likely to be polarising? i.e. 50/50?

3. Develop and prepare

When the project impact is established, activities can be planned to reflect the level of engagement required.

There are separate activities and communication methods used for community, members, Elected Members and internal stakeholders to be delivered both before and after a decision is made.

The greater the impact, the more responsive the approach becomes.

Everything comes together After a decision has been to deliver the engagement: made and the engagement Standard is complete it is necessary Planning is done to assess and evaluate the Impact established engagement aspect of the Stakeholders identified project. Engagement activities selected. Success criteria Marketing Formal reporting Communications **Digital analytics Engagement outcome** Evaluation Project team Survey: Participant, Project Officer, **Flected Members** Digital The findings help us improve our approach and allow us to report on engagement KPI's.

5. Close off and evaluate
